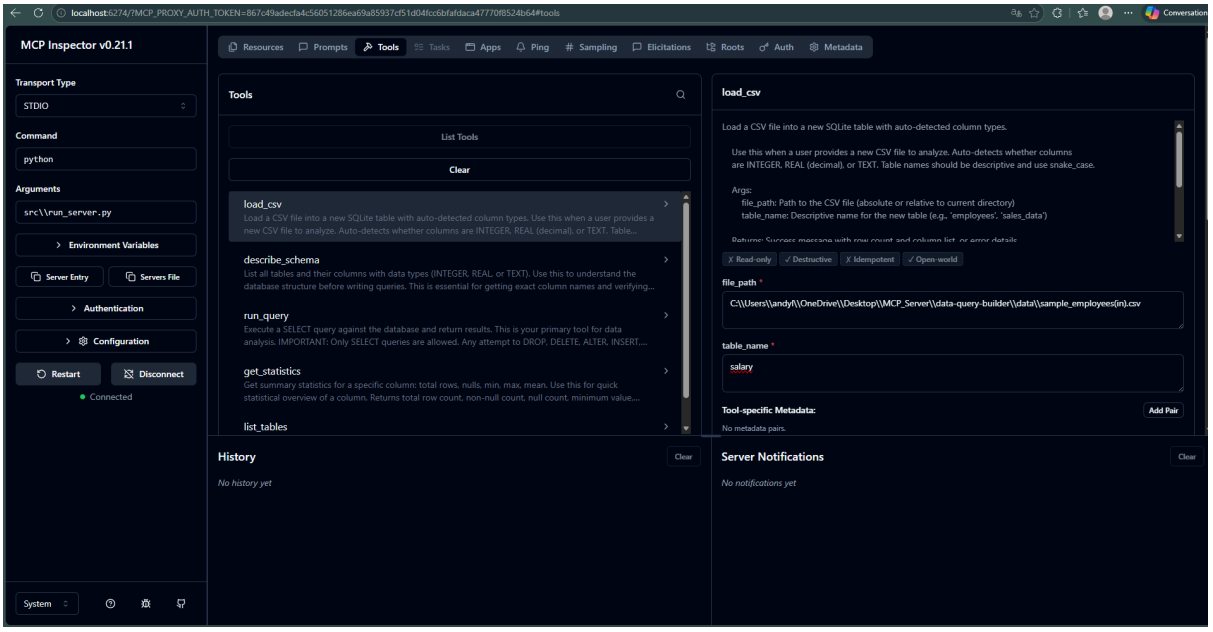
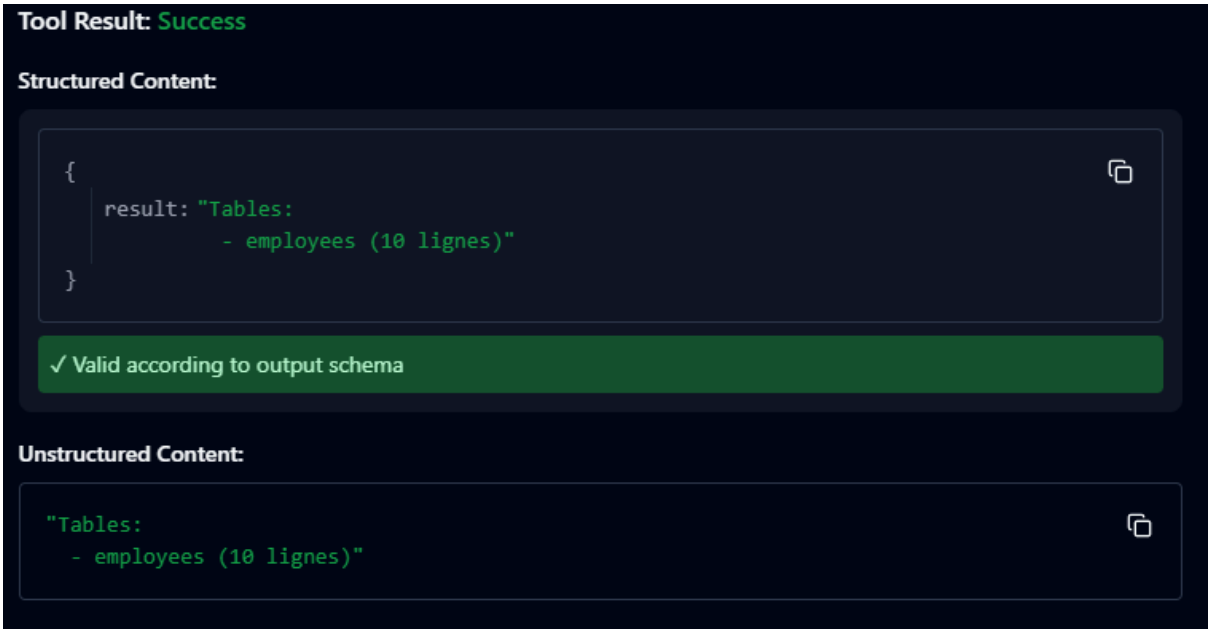
mcp server project

mcp inspector verification



the tools works perfectly



we can see that mcp is present in

gemini settings :

```
> /mcp

Configured MCP servers:

● data-query-builder - Ready (5 tools, 2 resources)
  Tools:
  - describe_schema
  - get_statistics
  - list_tables
  - load_csv
  - run_query
  Resources:
  - get_schema_resource (db://schema) [text/plain]
  - get_query_history_resource (db://query-history) [text/plain]
```

when we ask for statistics in precise doc, here's what happen

```
> give me some statics about these data @"C:\Users\andyl\OneDrive\Desktop\MCP_Server\data-query-builder\data\sample_employees(in).csv"

✓ ReadManyFiles Will attempt to read and concatenate files using patterns:

ReadManyFiles Result (Target Dir: C:\Users\andyl\OneDrive\Desktop\MCP_Server\data-query-builder)

Successfully read and concatenated content from 1 file(s).

Processed Files:
 - data/sample_employees(in).csv

✦ I will load the CSV file into the database and then calculate the summary statistics for you.

Action Required

?  load_csv (data-query-builder MCP Server) {"table_name":"employees","file_path":"data\\sample_employees(in).csv"}

... first 3 lines hidden (Ctrl+O to show) ...
MCP Tool Details:
(press Ctrl+O to expand MCP tool details)
Allow execution of MCP tool "load_csv" from server "data-query-builder"?

● 1. Allow once
  2. Allow tool for this session
  3. Allow all server tools for this session
  4. No, suggest changes (esc)
```

it’s processing using the tools

```
✓ describe_schema (data-query-builder MCP Server) {}

Table: employees
  - name (TEXT) NULL
  - age (INTEGER) NULL
  - salary (INTEGER) NULL
  - department (TEXT) NULL
  - hire_date (TEXT) NULL

✦ I'll calculate the summary statistics for the age and salary columns and then determine the average salary per department to provide a more detailed breakdown.

✓ get_statistics (data-query-builder MCP Server) {"table_name":"employees","column":"age"}

Statistics for employees.age:
  Total rows: 10
  Non-null: 10
  Nulls: 0
  Min: 26
  Max: 36
  Mean: 30.80

✓ get_statistics (data-query-builder MCP Server) {"column":"salary","table_name":"employees"}

Statistics for employees.salary:
  Total rows: 10
  Non-null: 10
  Nulls: 0
  Min: 65000
  Max: 105000
  Mean: 80700.00
```

and finally produce the answer

✦ The employee data from data\sample_employees(in).csv consists of 10 records. Here are the summary statistics:

Overall Statistics

Metric	Age	Salary
Count	10	10
Minimum	26	$65,000
Maximum	36	$105,000
Average (Mean)	30.8 years	$80,700

Average Salary by Department

Department	Average Salary
Management	$105,000.00
Engineering	$83,000.00
Marketing	$75,000.00
Sales	$73,333.33
